Glucagon	0.1 mg/kg 1 mg
Charcoal	1 gm/kg 18 gm

Available November 2007

EmergentMeds™ is an on-line, subscription based medication and equipment calculator designed for the office clinical setting where emergencies are not normal events. This program puts the emergency information you need in the palm of your hand rather than requiring clinicians to memorize the dosages, equipment and procedures. This up to date program uses the most recent American Heart Association guidelines for drug dosages, treatment protocols, and equipment recommendations. This program takes the stress of on the fly drug calculations at the patient's bedside out of the equation of patient care.
